## Maison Commerce

*Ukraine / The Netherlands*

*10.2022 - 12.2022*

### Fullstack Web Developer

Shopify e-commerce. Good team, but didn't like an absence of creativity: same designs, pages and elements for different clients. Also due to constant rozzian missile & drone attacks on energy infrastructure of Ukraine => had no electricity to perform work.

## CherryPie

*Ukraine, Dnipro*

*01.2020 - 04.2020*

### Junior Frontend Web Developer

First office job mainly using Angular.

Gave me a good start, but I decided to quit due to a COVID and absence of self-managing skills (regarding online work & study).

## YourAirTest

*Ukraine, Dnipro*

*10.2019 - 12.2019*

### Junior Frontend Web Developer

A brief interactive web cartography project about air quality, learned Angular from mentor.

Quit due to an exam season.

## WheelKeep

*Ukraine, Dnipro*

*02.2019 - 10.2019*

## Junior Frontend Web Developer, Junior Designer, Junior Native Developer, Junior Marketologist

First startup project about bike security. Discovered myself with different work roles, decided to stay as a Frontend Web.

Quit due to a burnout and vague future of a startup.

## DNU (University)

*2018 - 2023*

Bachelor in Software Engineering, Magister in Applied Math (modeling & computing). I got to know a lot of good people and qualified specialists from different fields.

## LIT (Lyceum)

*2016 - 2018*

The best lyceum in the city and in whole world. It had me prepared for university and real life. First teamwork projects, first self-motivation to study, first real-world examples and experience. IT teacher Entin Joseph Abramovich "one love". And some other teachers also.

## ITStep (Courses)

*2014 - 2016*

Usual school-academy courses to discover everything in IT
